

Figure 10 is a line graph showing the relationship between FWHM ENC [keV] (Y-axis) and Peaking times (X-axis). The Y-axis ranges from 0 to 25 keV, and the X-axis ranges from 0 to 7. A red dashed line is drawn at 4 keV. Multiple colored lines with asterisk markers represent different data series, all showing a general decrease in FWHM ENC as peaking time increases, converging towards the 4 keV line.
